To strengthen our **Technical Service Center in Dormagen**, we are looking for a:

## **ANALYTICAL TECHNICIAN (R&D CENTER) (m/f)**

As a member of the analytical team your main tasks will be instrumental analysis on Engineering Plastics as PA66 (Polyamide 66), POM (Polyacetal Resin) and m-PPE (modified Polyphenylene Ether Resin). You will do injection molding and evaluations. In near future the analytical team might also support additional divisions and thereby have new interesting tasks. The analytical team will work close with Technical Service and Development Team to realize customer needs. Work with our other technical centers in Japan, China, Singapore, Thailand and USA.

### **Your tasks:**

- Evaluate our engineering plastics in R&D Center with using universal testing machine, Charpy impact tester, HDT, MVR, K-F Titrate, GPC, DSC, TGA, TMA, SEM/EDX etc.
- Organise the daily laboratory works and maintain the equipment and machines
- Introduction of new equipment and set up
- Creating analytical reports
- Collaboration with technical service team

### **Your qualification:**

- Professional training as Laborant in material testing/ chemical/ plastics industry or Bachelor/ Master degree in Engineering such as Chemistry/ Polymer Chemistry/ Material Science/ Process Engineering/ Mechanical Engineering

- Fluent German and English (both oral and written)
- Very good ability of documentation processing.
- Very good presentation ability in German and English
- Communicative and team oriented attitude
- Good practical knowledge of Engineering Plastics is preferred
- Practical experience of plastics processing such as injection molding, evaluation of polymer in laboratory, chemical analysis is appreciated
- Intercultural experience is a plus

### **Our offer:**

You will become part of an international and growing team which is successfully exploring the European market. Based on this we offer you an exciting working place that provides a lot of opportunities to grow within the company. You will enjoy working in a friendly, young and diversified team which is part of a very strong and well-established global enterprise. In addition to that we obviously do also offer you a quite competitive and attractive compensation package.

### **Interested?**

If so, we are excited to receive your CV (including cover letter and some information about your salary expectations and the earliest starting date). As data security is very important to us, please have a look ([here](#)) of how we process your personal data. Please send your application to: [HR@asahi-kasei.eu](mailto:HR@asahi-kasei.eu)  
Happily looking forward to hear from you.
