# AsahiKASEI

Asahi Kasei has been leading SBR and BR business in the world. We would like to further expand our business in Europe. To strengthen our technical support in Europe we are now expanding our **R&D Technical Service Center in Dormagen**, by the Synthetic Rubber division. Amongst others we are looking for a:

## **TECHNICAL SERVICE ENGINEER: SYNTHETIC RUBBER (m/f)**

Your main task should be the technical support of European customer for our SBR and BR. Based on our customer's request you arrange experiments to obtain technical data and provide excellent support regarding their requirements. You will work with our other technical team in Japan and Singapore as well as our team in Dormagen. We would welcome a person who has desire for work and research.

### **Your tasks:**

- To listen European customer's technical requirements carefully and answer them
- To make an evaluation plan of our products for customer
- To analyze and consider the principles from the experimental result
- To support the Set-Up of our new R&D Center in Dormagen, introducing laboratory equipment and machines
- To organize the daily laboratory works and maintain the equipment and machines
- To work with our sales and marketing team closely to support our daily business

### **Your qualification:**

- Master or PhD degree in Engineering such as Chemistry, Polymer Chemistry, Material Science, Process

Engineering or Mechanical Engineering

- At least 2 year's practical experience of rubber field
- Good knowledge of rubber chemistry
- Practical experience of rubber processing such as mixing, evaluation of compound in laboratory, chemical analysis
- Fluent German and English (both oral and written)
- Very good presentation ability in German and English
- You don't have so much regular business trips inside EU (less than 20% working time). But the training outside EU like in Japan will be planned, if it is needed (Intensive training ca. several weeks depending on his / her experience)

## Our offer:

You will become part of an international and growing team which is successfully exploring the European market. Based on this we offer you an exciting working place that provides a lot of opportunities to grow within the company. You will enjoy working in a friendly, young and diversified team which is part of a very strong and well-established global enterprise. In addition to that we obviously do also offer you a quite competitive and attractive compensation package.

## Interested?

If so, we are excited to receive your CV (including cover letter and some information about your salary expectations and the earliest starting date). As data security is very important to us, please have a look ([here](#)) of how we process your personal data. Please send your application to: [HR@asahi-kasei.eu](mailto:HR@asahi-kasei.eu)  
Happily looking forward to hear from you.
