

The power of connected minds

Automation Engineer (m/f/d) for Process Control Systems

We are the world's leading chemical company because we offer intelligent solutions for our customers and for a sustainable future. We connect and develop people with diverse talents all over the world. For you, this means a variety of ways to advance. Not only your performance but also your personality matter to us, without regard to gender, age, origin, sexual orientation, disability or belief. At BASF, careers develop from opportunities.

Ludwigshafen is the world's largest integrated chemical complex and home to BASF Group headquarters. Located in the heart of Europe's Rhine-Neckar metropolitan region, you will find this to be an attractive place for both work and leisure time.

What you can expect

Our Automation Technology unit develops innovative automation solutions based on advanced process control systems.

- o You will advise and support customers as well as Partners (m/f/d) in the handling of projects with a connection to control systems in order to enable stable automation solutions that create value.
- o In addition, you will work within a global network of experts on technology management.
- o In the process, you will focus on process control systems and on integrating basic automation into business processes.
- o You will participate in quality assurance for automation systems and automation solutions.
- o Last but not least, you will be responsible for productive management of suppliers and resources.

What we expect

- o You have a degree in automation Technology, electrical engineering or in natural sciences, on which you earned above-average marks.
- o It is easy for you to identify the needs and requirements of customers (m/f/d) as well as partners (m/f/d) and recognize where change is needed, and you enjoy developing creative solutions for this.
- o In the course of these activities, you are responsible for your decisions on a forward-looking basis in order to achieve the company's long-term goals.
- o You contribute actively within the team and communicate authentically and persuasively in the process.

We offer

- o Responsibility from day one in a challenging work environment and "on-the-job"
