

The power of connected minds

BASF
We create chemistry

Explore Together - International Internship Program - Mechanical Engineering - Houston

We are the world's leading chemical company because we offer intelligent solutions for our customers and for a sustainable future. We connect and develop people with diverse talents all over the world. For you, this means a variety of ways to advance. Not only your performance but also your personality matter to us, without regard to gender, age, origin, sexual orientation, disability or belief. At BASF, careers develop from opportunities.

Every year Explore Together gives a small number of top science, engineering and economics students the opportunity to take a unique look at the working world of the global giant BASF.

What you can expect

During this 6 month internship in Houston, starting in 2019, you will support two ongoing projects within our engineering department and will learn to work independently and intelligently in a professional environment.

- o You will collaborate with the mechanical engineering design team and contribute to the project development and execution.
- o You will support quality assurance and control of the mechanical equipment design.
- o In addition, you will become an active member of our team in Houston and will attend as well as participate in mechanical group and project meetings.
- o Furthermore, you will take over responsibility for your working results right from the beginning.

What we expect

- o You are in an advanced stage of your studies in mechanical engineering, for which you have achieved above-average results and have engaged in extracurricular activities.
- o You have already had the chance to gather practical experience abroad and speaking an additional foreign language will be considered as a plus.
- o You are a proficient English speaker with an academic background and a passion for mechanical engineering? Then you might be the perfect match for our international internship program in Houston, USA!
- o In addition, you are an innovative team-player who contributes to creative solutions and who has gained practical experience within the industry.
- o Please apply with your full set of documents: Letter of motivation in English, containing specifications regarding timescale and duration. Furthermore, your CV in English as well as all relevant certificates and references in original language.
