Enterprise Architect (f/m/x)

Job reference: 122471

The future-ready design of IT architectures is one of the major challenges and an important success factor in agile transformation. As an Enterprise architect (f/m/x) your challenges will include the following:

Your responsibilities:

- You will create the IT target architecture for BMW Group IT.
- Also the creation of architectural guidelines and conventions is part of your job.
- You are responsible for the close collaboration with DevOps teams.
- You will actively advise the teams in their implementation and also design the technological roadmap.
- The support of the "Back 2Code" initiative for the development of internal skills is also a part of the role.

With your know-how and commitment, you will make a crucial contribution to designing the future of the BMW Group!

You should have:

- University degree in computer science, business informatics or a comparable qualification.
- In-depth experience in the field of architecture development, integration architectures and software development.
- Solid knowledge of at least one common programming language (Java, Python, C#, NodeJS).
- Ideally, experience in cloud technologies, CI/CD, Big Data / analytics and machine learning.
- In-depth knowledge of agile approaches.
- Good knowledge of English is essential, additional German knowledge would be an advantage.
- Very independent work approach.

Are you looking for an exciting challenge? Then join our team. We look forward to receiving your application. You can find detailed information and apply online at www.bmwgroup.jobs
