

# Trainee in Automation Engineering

BE AN ESSENTIAL PART OF EVERYDAY LIFE

## ARE YOU GRADUATING OR HAVE YOU JUST FINISHED UNIVERSITY, AND WANT TO MAKE THE MOST OF YOUR KNOWLEDGE?

DHL offers you a unique opportunity to gain professional experience and start a career right after college!

In this position, you will be well prepared for the next stage of your career at DHL Supply Chain. During the development program you will work in different areas of Automation implementation. You will get the chance to work closely with our Automation Experts in projects and operations.

We recruit fast-learning and visionary young potentials with a hands-on mindset and "can-do" attitude, who take initiative and are constantly looking for improvements in their area.

### What will be your job?

- Collaborate on projects, develop an implementation ready layout and fit out concept considering business requirements / investment / time of implementation vs. commercial framework
- Participate in the running of the automation work stream, from detailed design workshops to implementation and various final technical acceptance testing before delivery, until handover to the Project Delivery/Operations department
- Work closely with the customer, and the DHL departments of Solution Design, IT, Safety, Security and Operations to transform customer requirements into optimum an automated warehouse solution
- Analyze logistics data - you just feel at home in Excel
- You will gradually go through several positions with different content and within projects to gain as much experience and skills as possible

### Your profile:

- Graduated Bachelor or Master in Logistics, Technical/Engineering (max. 1 year after graduation)
- Advanced knowledge of MS Office (Excel and PowerPoint)
- Interested in logistics and supply chain
- Very good knowledge of English and German language (verbally and in writing)
- Interested in Automation technique
- Analytical, eager to strive for the best result every day, communicative, proactive, energetic and ready to take on challenges are traits that suit you well
- Creative and innovative skill
- Thinking outside of the box
- Attentive and accurate skills
