# Internship starting April 2019 in the field of Advanced Analytics & Big Data

## Tasks

A compelling innovation changed the world: the automobile. That was the origin of today's Daimler AG. Now a premium provider with a global presence and approximately 270.000 employees. Today it is above all IT-based innovations that are changing the world. At the Center of Excellence Advanced Analytics & Big Data, we use highly innovative technologies to develop Advanced Analytics prototypes and are responsible for the global data platform for advanced analytics and artificial intelligence.

## Your tasks in detail:

- Support data science and Machine Learning projects across the whole value chain of Daimler
- Collaboration and communication with our national and international partners
- Project related collaboration with other departments, Business and IT partners
- Organization and preparation of community workshops related to the field of Artificial Intelligence and Machine Learning

## Qualifications

- Degree Course: Computer Science, Mathematics, Statistics, Engineering, Physics or related field
- Language Skills: Very good communication skills and proficiency in English and German
- IT skills: Experiences with MS-Office, Python and R desirable
- Soft skills: You are self-initiative, reliable, and strategical working, you possess good analytical-conceptual skills and a high willingness to learn, you are a team player and dedicated
